MachineLearning  
Enthusiast | Tech Blogger

I am a machine learning engineer, tech content creator, and blogger with 2 years of professional experience in Research & Development and 4 years of experience in tech content creation. I am enthusiastic about cutting-edge technology and solving real-world problems. I have written many articles about coding and the technology involved in machine learning and artificial intelligence. It made me proud to be a researcher. I like two words in English: discipline and consistency. This is what I always believe in to reach the goal. I understand every bit and byte of a computer. Like, English to machine language zeros and ones feeding the logic gates of the computer transistors.

### **Distributed Deep Learning | Horovod | Message Passing Interface(MPI)**

The goal of Horovod is to make distributed Deep Learning fast and easy to use. The primary motivation for this project is to make it easy to take a single-GPU TensorFlow program and successfully train it on many GPUs faster.
